

Toast Tax Changes

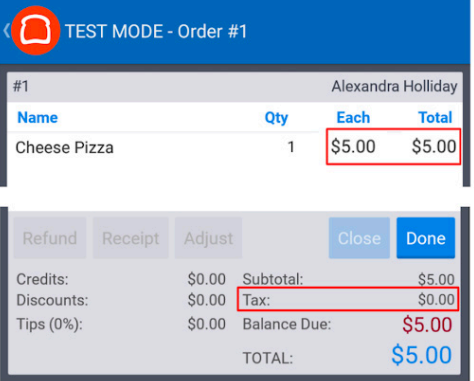

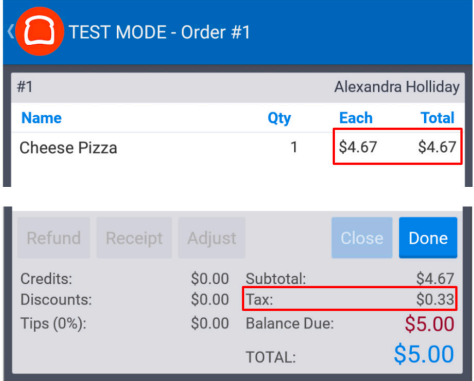

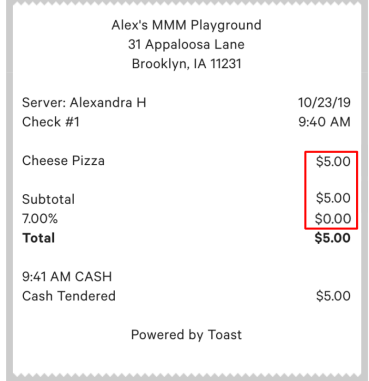

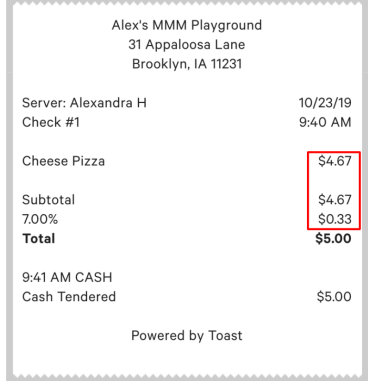

Product Update

Toast will be making two changes to tax included items this year. Tax included items are items whose price includes the associated tax. Make sure to review the changes below!

Receipt & POS Display

In order to ensure that Toast is accurately reflecting the amount of tax a guest is paying on their transaction, your system will now display the correct amount in the Tax field for tax included items in the POS and on receipts. Previously, this field always displayed \$0.00.

Note: This change does not affect how taxes or menu items are calculated.

Fixed Amount Discounts

In order to ensure that Toast is only charging guests tax on the actual price of an item or check and *not* on the pre-discount price, tax amounts will now be calculated on the price after a discount is applied.

Note: This does not mean that guests will be *under* taxed. Instead, moving forward, this prevents guests from being *over* taxed.

<i>Before Change</i>	<i>After Change</i>
<p>Menu Item Price w/ Tax - Discount = Final Total</p> <p>Example: \$5.00 - \$2.00 = \$3.00</p>	<p>Menu Item Price w/ Tax - Discount = Post-Discount Price</p> <p><i>then</i> Post-Discount Price x Tax Rate = Final Total</p> <p>Example: \$4.67 - \$2.00 = \$2.67 x 1.07 = \$2.86</p>

Additional Notes:

- These changes are not configurable. They are required updates to your Toast system.
- Orders created prior to this change will be unaffected.
- This change is compatible with all of Toast's integration partners.
